Subject: SAVE THE DATE: 2019 Water Data Science Symposium

California Water Quality Monitoring Council

Who and What? The Surface Water Ambient Monitoring Program, California Water Quality Monitoring Council, California Water Board Data Center, and San Francisco Estuary Institute are partnering to host the Fourth Annual California Water Data Science Symposium.

When? July 1-2, 2019, detailed agenda to follow.

Where? The CalEPA Building, Sacramento, CA.

Why? This is an annual event that aims to enhance the marriage between water quality monitoring science and data science to better inform water quality and ecosystem management decisions. This year's symposium will revolve around the theme of "Open Water California: Innovating through Integrating and Expanding the Water Data Community." A growing amount of water data is being collected by a local and regional groups. We would like to engage and collaborate with this growing network of stakeholders to make the data they collect available for use throughout California.

How? Presentations, expert panel discussions, and posters are expected on the following topics:

Ecological Flows
Citizen Monitoring
Innovation
Climate Pressure

In addition to these broad themes, abstracts addressing the following specific topics will be prioritized for inclusion in the Symposium program:

Statewide monitoring programs
Innovative monitoring tools
Open data
Data visualization and communication
Civic engagement

Visit the [Symposium webpage](#) for the agenda, abstracts, and speaker bios as they become available.
